A

Cohort	Ancestry	Data	n	Traits	Role
UK Biobank (UKB)	Mainly European	Exome; gene burden (Genebass)	394,841	31	Discovery
Genes & Health (G&H)	British South Asian	Exome; gene burden and variant level	≈33,000 analyzed	24 / 12	Replication
FinnGen	Finnish	Imputed GWAS; variant level	Height 364,515; labs up to 447,271	23	Replication
BioBank Japan (BBJ)	Japanese	Imputed GWAS; variant level	Height 165,056; labs 46,848–154,355	23	Replication
FinMetSeq (FMS)	Finnish	Exome; variant level	19,292	6	Replication
Exome chip (pre-UKB)	Mainly European	Array; variant level	112,000–459,000	Height, lipids, blood, kidney	Replication

No cohort overlaps with UKB. FinnGen shares FINRISK participants with FMS and exome-chip studies and is not combined with them.
